AMERICAN EXPRESS OPTBLUE PRICING PROGRAMS

Program Description and Exclusions

This American Express program is designed to increase acceptance of American Express card among small merchants in the United States. This program offers an integrated service and competitive pricing through eligible third party acquirers and payment processing companies.

Each participant is allowed, under this program, to solicit United States merchant prospects that meet established criteria, such as estimated American Express charge volume of less than \$1,000,000 in transaction currency of U.S. dollars and prospects not specifically excluded due to merchant category or their prohibitions.

This American Express program is different from prior American Express programs as it allows for merchant pricing flexibility. In addition, under the American Express OptBlue program, American Express is not required to be a party to the merchant processing agreement.

On the Fiserv North platform, the program will be identified under Product Code '08'.

On the Fiserv Omaha platform, the program will be identified under Card Type '043'.

Following are the eligible merchant industry categories, which consist of multiple merchant category codes (MCC). American Express has designated a unique SE number per industry (American Express will not assign an SE number to an individual merchant).

- B2B/Wholesale
- Education
- Emerging Market
- Government
- Healthcare
- Restaurant
- Retail
- Services/Professional Services
- Travel and Entertainment
- Charity
- Insurance
- Residential Rent
- Utilities
- Online Gambling
- Other (any approved MCC not included in this list of industries)

Note: OptBlue pricing is MCC-driven and based on industry category. MCC must match between authorization and submission records or be subject to a Data Quality fee of 0.75% of the transaction amount.

The following product category is applicable to all industries and is not associated to a specific assigned SE number:

- Prepaid

Other fees included depending on transaction type/issuing region:

0.30% additional fee will be charged by American Express whenever a Card not present / non-swiped transaction occurs. A Card not present / non-swiped Transaction Fee is a fee applied to any Charge for which American Express did not receive both (i) the full Magnetic Stripe or Chip Card Data from the Card/Device and (ii) the indicator as to whether the Card was swiped or Chip Card inserted. This fee is applicable to all industries, except the Emerging Market, Charity, Insurance, Residential Rent and Utilities industry product categories.

An Inbound fee of 1.00% will be applied on any Charge made using a Card, including Prepaid Cards, that was issued outside of the United States (the United States does not include Puerto Rico, the U.S. Virgin Islands and other U.S. territories and possessions).

For a listing of industries excluded from participation in the American Express OptBlue Program, see Table 12. You can also reference the American Express OptBlue Operating Regulations, Appendix J- Prohibited Merchant Industries and Categories.

*** Rates listed herein are inclusive of above noted payment brand fees unless specifically otherwise noted.**
