EPICOR

Are You Ready?

Give your buyers what they want

Digital commerce adoption is on fire. Gartner reports that 80% of buying and 85% of selling organizations have formal goals to increase web site purchasing. 65% cite fostering business innovation and 62% cite improving customer satisfaction as key drivers.¹

eCommerce is no longer reserved for smaller-ticket items and fast-moving parts. Today, McKinsey reports that 70% of B2B decision-makers are open to new, fully self-serve or remote purchases in excess of \$50K USD. One in three buyers would choose a vendor based solely on their ability to place, pay for, track and return orders online. That says a lot.²

In fact, McKinsey's research shows that more than three quarters of buyers and sellers now prefer digital self-serve and remote human engagement over face-to-face interactions, and only about 20% hope to return to in-person sales, even where field-sales models have traditionally dominated.

It's a critical opportunity for B2B. "The shift to virtual sales can help sales organizations lower their cost per visit, extend their reach, and significantly improve sales effectiveness — while delighting customers who are demanding these new ways of interacting stick long term and who are likely to reward suppliers that do it well."³

Epicor Commerce can help you gain new market share cost-effectively and enable your customers with a user experience that will increase their loyalty, and your profitability, wherever you are on your eCommerce journey. Your buyers are ready for eCommerce; are you?
