

Epicor Secure Backup

Available for P21[®], Kinetic, BisTrack[™], LumberTrack[™], and Eclipse[™]

Backup and disaster recovery protection for your on-premises Epicor ERP solution

Why Choose Epicor Secure Backup?

Modern data protection using the Commvault Enterprise backup solution helps ensure that your data is backed up and stored securely offsite in the Epicor cloud.

With the proliferation of ransomware—malware that encrypts your data until a ransom is paid—it's critical that offsite data backup is a key part of your cybersecurity plan. Even if cybercriminals infiltrate and encrypt your data, Epicor Secure Backup shelters clean copies in the Epicor cloud so it can be quickly recovered. Backup of your data to the Epicor cloud protects you from cybercrime and on-premises damage like fire or storms.

Help ensure your data is secure and avoid costly data loss scenarios

- Integration with EpicCare allows that your backup is monitored and allows for proactive troubleshooting and resolution
- End-to-end encryption, including data-at-rest and data-in-flight encryption
- 7-day data retention policy permits that multiple restore points are readily available

Epicor Secure Backup

Benefits

Protect your business from modern threats like ransomware as well as disaster scenarios such as server failure, fire or flood

Enable data availability and business continuity for your Epicor ERP solution

Reliable offsite backup for rapid restore and disaster recovery

7-day data retention policy

Integration with EpicCare

End-to-end encryption including data-at-rest and data-in-flight

Allows redundancy and scalability to meet the needs of your growing business
