

Epicor Security Suite

A multi-layered approach to protecting your business from increasingly sophisticated cyberthreats

Cybersecurity threats are rapidly increasing, costing the global economy trillions of dollars, and cyberattack tactics are constantly evolving—the most effective cybersecurity strategy includes a multi-layered defense system.

Epicor Security Suite

At Epicor, we understand the value of keeping your systems and data safe from cyberthreats, and we offer a full suite of security offerings based on leading industry technologies.

Epicor Security Suite adds layers of protection designed to defend your local networks and hardware. Epicor Security Suite services are fully operated and managed by Epicor security experts, making it ideal for companies that may not have an in-house IT staff to maintain proper network security or want to extend their IT security staff or expertise.

Epicor Secure Firewall Service

A subscription-based firewall service that includes a SonicWall firewall appliance, service and support to protect your network at its perimeter.

SonicWall Capture Client

Next-generation malware protection engine powered by SentinelOne® with multiple capabilities to defend against and recover from modern threats such as a ransomware attack.

Epicor Secure Backup

Offers reliable offsite backup for rapid restore and disaster recovery for on-premises customers, leveraging the Commvault® enterprise backup solution.

Cellular ISP Failover*

Cellular internet modem from Cradlepoint serves as a secondary internet connection, providing connectivity during a primary ISP outage or natural disaster like a hurricane or flood.
