

Epicor® Prophet 21® Bin Management

Now available in iOS and Android Devices

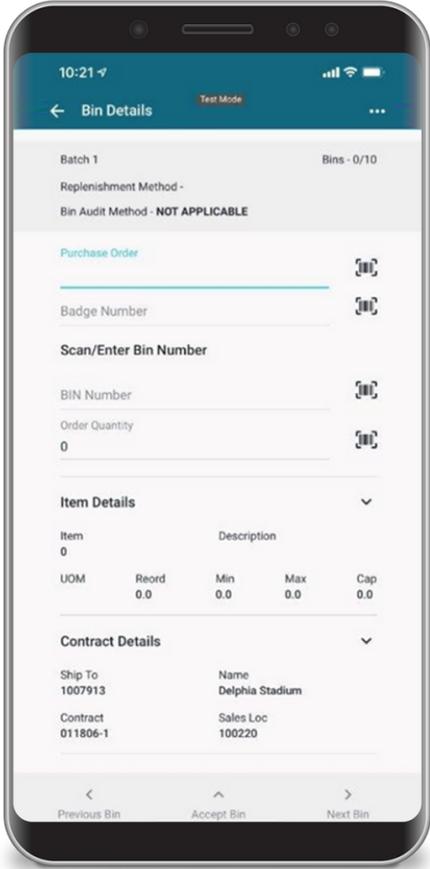

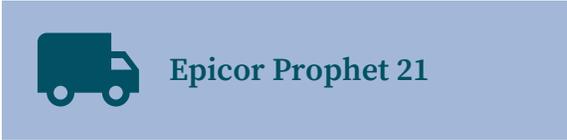

Many distributors provide a service to their customers by providing products on-site and charge their customers only when used.

Prophet 21 Bin Management helps you manage this process and increase the efficiency and accuracy of your inventory at a customer's location. Prophet 21 Bin Management helps ensure that the products are put in the right location every time. In addition to choosing the zone the product should be in, Prophet 21 Bin Management allows you to add details about where you want the item to go, including location class, price, max quantity, item size, and many other features.

Increasing Efficiency and Accuracy

When your field sales representative visits a customer site to perform an inventory audit, they download the customer's information to a mobile device and uses it to scan select bins. They can then create a replenishment order to restock those bins based on their current inventory levels and replenishment methods. Once the order's done, your sales representative uploads it to Prophet 21 software, where it's processed like any other order. The customer receives the goods and an invoice. You handle when and how much they order for them, and by creating orders immediately on-site, you ensure everything's accurate.

The Prophet 21 Bin Management app is available in the Apple App Store and Google Play Store and runs on modern iOS and Android devices. Please visit the Apple App Store or the Google Play Store to download the app today!

Benefits

- Improves efficiency for distributors who manage inventory at their customer sites.
- Helps ensure products are in the correct location
- Now available on iOS or Android devices—free download

EPICOR

We're here for the hard-working businesses that keep the world turning. They're the companies who make, deliver, and sell the things we all need. They trust Epicor to help them do business better. Their industries are our industries, and we understand them better than anyone. By working hand-in-hand with our customers, we get to know their business almost as well as they do. Our innovative solution sets are carefully curated to fit their needs, and built to respond flexibly to their fast-changing reality. We accelerate every customer's ambitions, whether to grow and transform, or simply become more productive and effective. That's what makes us the essential partners for the world's most essential businesses.
