Easily find the best rate for your shipment

Saving money is important for any business. The Epicor Quick Ship Rate Shopping web application helps deliver savings to your company and your customers. Whether shipping with truck or parcel carriers, Epicor Quick Ship Rate Shopping is tightly integrated with your Epicor Prophet 21 solution. It offers rate shopping at order entry or at the time of shipping to keep shipping costs low for your customers and to drive new loyalty for your business. Rate shopping is available as an additional module for both Quick Ship Express and Quick Ship Premier.

The calculated freight also automatically flows back to Epicor Prophet 21 to ensure you are billing the customer what was quoted.

Compare rates from your preferred carriers

Upon launching, the Epicor Quick Ship Rate Shopping application brings in the order details—including shipping destination—and breaks the order down by shipping container. Containers can be from different sites, feature different shipping days, and have different sizes and values.

Clicking on the Rate Shop button begins the process and pulls your account number with various domestic and international freight and parcel carriers—including FedEx™, UPS™, DHL™, USPS™, and more—to search and compare the best rates. Sometimes you need the cheapest rate, sometimes you need the fastest rate, and sometimes you need something in the middle. Pricing and estimated arrival information are displayed in an easy-to-read chart—allowing you to quickly compare rates to find the best one for your order.

Once you select a rate, you can submit it to your ERP system, and you even have the option to include the quoted freight charge on the order.
